

ScoreBoard™

Dominate the ScoreBoard

Make better, data-driven decisions with the world's first hotel Revenue Intelligence platform, ScoreBoard. Analyze and forecast performance across your entire company and deliver actionable insights to key stakeholders in real time.

Hoteliers cannot afford to waste time and resources waiting for property-level data to be compiled. If building and running reports on revenue across the entire organization takes days or weeks, then the company's budgets and forecasts are already obsolete by the time they reach the right people. ScoreBoard allows hotels to centralize performance data and forecasts, which hoteliers can analyze and share with the push of a button.

The easiest forecast you'll ever build.

With month-level entry and the flexibility to make stay date level adjustments, you spend minutes, not days, building forecasts and budgets. With the ability to customize the forecast editor to fit your workflow, compiling the data you need to make the best decisions is easy. Duetto's industry-first "smart spreading" technology takes updates to your monthly forecast and intelligently allocates them day by day, segment by segment.

KEY BENEFIT

SAVE TIME

Stop waiting days for numbers to come in, and instead work with real-time data. Customize reports with more than 50 different fields of data and share with one click.

duetto

ScoreBoard™

Real-time visibility into your data.

Eliminate the wasted time and frustration caused by extracting and manipulating data from your other systems. Use ScoreBoard's fully customizable reporting with dozens of metrics, filters or comparisons to find exactly what you need. Get more time to analyze trends, formulate pricing strategies and put those plans into action.

Duetto's hotel Revenue Intelligence platform brings together all of your data sources, from every property, for easy visualization. Track not only your historical numbers and forecast, but also dynamic information sets that power a truly elevated Revenue Strategy:

- Web Shopping
- Market Trends
- Reviews & Ratings
- Benchmarking
- Booking Pace
- Ancillary Revenue
- Reservations
- Competitor Pricing
- Air Travel
- Social Media
- OTA Rate Shops

KEY BENEFIT

REDUCE STRESS

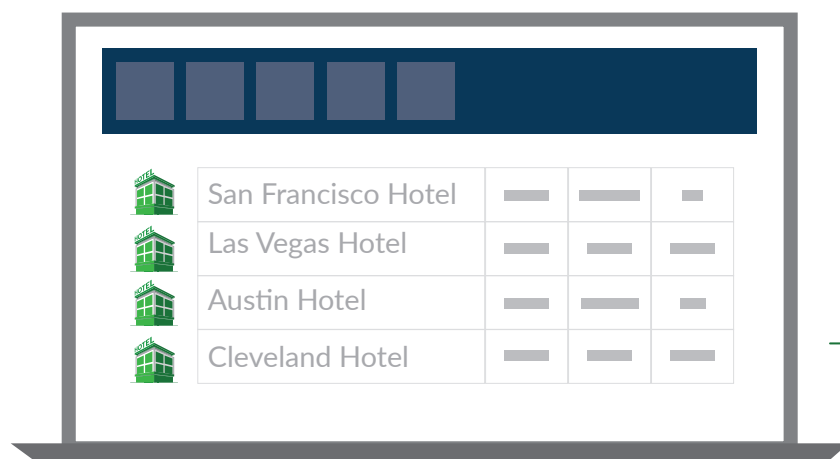

Avoid the keystroking or formula errors that happen when a company runs on dozens of spreadsheets. Ensure your data's integrity and reliability with a platform supported by cloud architecture.

duetto

ScoreBoard™

Multi-property management made easy.

Roll everything up into customizable reports capable of presenting the big picture across the entire organization, while still drilling down on property-level details. Evaluate which properties in your portfolio need more strategic focus and drive greater performance across the entire company.

KEY BENEFIT

SAVE MONEY

Arm your team members with accurate, actionable data that will make them more strategic and productive. Scale your capabilities and grow your business.

Speaking of ScoreBoard

“What good is all this data if it takes too long to access it or make it actionable? We’re confident that NH will be able to move beyond spreadsheets and develop better business strategies across 400 hotels around the world, now that we have far better visibility into our data and the ability to access and share it faster. Speed and accuracy make all the difference when hotel distribution and traveler preferences change so quickly.”

Fernando Vives
Chief Commercial Officer, NH Hotel Group
